**SUBJECT: 22<sup>nd</sup> October, 2008, Real-time Air Monitoring Results  
Sydney Tar Ponds Agency – Material Processing Facility  
FINAL REPORT**

---

Attached is a summary of Real-time particulate (as PM<sub>10</sub>) results for air monitoring performed on the 22<sup>nd</sup> of October, 2008. Colin MacIsaac and Alison Giovannetti of ALL-TECH Environmental Services Cape Breton Limited (ALL-TECH), performed all air monitoring activities.

Weather conditions on the day of sampling:

- Overcast, showers
- Temperature: approximately 7°C
- Wind Direction: East

**Comments:** *ALL-TECH was on-Site at 0730 and sampling began as soon as there was site activity. Air monitoring was performed during EarthTech's construction activities. Monitoring was put in stand-by mode between 1030 and 1400 due to precipitation.*

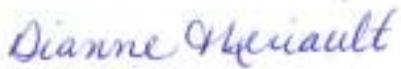

All downwind and upwind measurements of PM<sub>10</sub> were below the established Site Action Level for this parameter of 155 µg/m<sup>3</sup>.

All downwind and upwind measurements of Total Volatile Organic Compounds (TVOC) were below the established Site Action Level for this parameter of 0.66 ppm. Each measurement is the average of a 15 minute sample. A minimum of 2 samples were taken downwind and 1 sample upwind every hour. All measurements were found to be below the detection limit of the instrument. Levels above detection limit will be noted in the table below.

Due to operational criteria, during periods of precipitation (snow and rain) and high humidity, TVOC sampling is halted and resumes after the precipitation has ended.

This report has been prepared by Alison Giovannetti and reviewed by Dianne Theriault. If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

---

Dianne Theriault, B.Tech  
Environmental Technologist  
**ALL-TECH Environmental Services Cape Breton Ltd.**

| 17<br>50m E of Midland building                 | 1630               | 155  | 10                                       | East                  | Downwind                 | Excavators in operation        | No observations seen to effect sampling integrity |

**Notes:** Air sample duration for each monitoring event was 15 minutes.

### Comparison of Downwind Daily Results for Dust Budget

| Location                  | Duration     | Dust Budget Value ( $\mu\text{g}/\text{m}^3$ ) | Dust Budget Exceedance Value ( $\mu\text{g}/\text{m}^3$ ) |
|---------------------------|--------------|--|---|
| 50m E of Midland building | 0800 to 0859 | 6  | 990   |
| 50m E of Midland building | 0900 to 0959 | 13   | 990   |
| 50m E of Midland building | 1000 to 1059 | 20   | 990   |
| 50m E of Midland building | 1400 to 1459 | 30   | 990   |
| 50m E of Midland building | 1500 to 1559 | 40   | 990   |
| 50m E of Midland building | 1600 to 1659 | 50   | 990   |

### VOC Monitoring
